PMO 593

Two-Component MS Polymer Joint Compound

FAST, EASY, CRACK RESISTANT – DRYWALL FINISHING DESIGNED FOR MODULAR CONSTRUCTION

RAPID CURING

Cut curing time to 4 hours, complete the finishing process on the same-day without waste of factory space for drying or storage.

SINGLE-STEP APPLICATION

Simultaneously fill & smooth drywall joints with no shrinkage and no seam tape! Applies from a dual-cartridge dispenser (PMO 593 "F" version) or choose to work from a bucket (PMO 593 "S" version).

SAFE PERFORMANCE

Joints remain intact during module transportation & handling.
