

# ARDEX CUBE®

## Medium-Capacity Mobile Mixing Pump

The ARDEX CUBE® mobile mixing pump is designed for outdoor location, eliminating freight elevators and material staging, dust, bag disposal and allowing single source for power and water. It will accept bulk super sacks of ARDEX material with a 6,000-pound bulk hopper with a bag-piercing device to provide top load capability. The ARDEX CUBE has an inline continuous mixer, rotor stator pump, on board generator and an optional crane.

The CUBE® is available in a standard model with 7,200 pounds of pumping capacity per hour. The system also pumps 150 feet vertically and 400 feet horizontally.

\* Pumping capacities and distance will vary based on material consistency.
