

# ARDEX TLT™ Building Panels

## Installation Guide for Mosaics

---

The ultra-thin, 1/8" ARDEX TLT™ Building Panels are the perfect waterproof tile building panels for backsplashes, tub decks, floors, under mosaic strips in all tile designs.

### MOSAIC ACCENT STRIPS

The 1/8" ARDEX TLT™ Building Panel provides a perfect, even surface to perfectly install mosaic accent strips into large format wall tile assemblies.

This helps avoid excess mortar build up and leveling when trying to evenly align thicker tiles with the thinner mosaic tile strip.

These ultra-thin ARDEX TLT™ Building Panels can be pre-tiled in the shop and simply adhered into the wall assembly on-site using thin set mortar applied to the back of the strip only.
